

HOW TO PLAY:

ELECTRONIC BINGO

Electronic bingo is the electronic version of classic paper bingo.

Getting Started:

Before you start playing you'll need to make sure you've purchased electronic credits at the sales counter. Then you are ready to begin playing!

Here's How to Play:

1

First you'll need to check the session program to see which game you are playing. Games are generally listed by colour. Or you can listen for the caller to announce the pattern.

2

Next, choose your electronic unit and begin to purchase your eBingo games for the session.

3

Once the session starts, the correct game strip will be displayed for you on your monitor.

4

Your screen will display all of the Bingo balls that are called. The flashboard on the screen will show you all the balls called and your cash balance.

5

With electronic bingo your cards will be dabbed automatically as the numbers are called.

6

If you get a winning pattern, the bingo button will light up and you must yell BINGO!

All prizes are automatically credited to your electronic account.

For more details on how to play, pricing and odds, please ask a customer service representative.

REMEMBER: In order to win you must yell BINGO!
