

# PROLINE

## SPORTS WAGERING LIMITS POLICY CHANGE

Effective April 1, 2024, OLG's sports wagering limit for PROLINE will be \$100 per outcome (individually or combined), per customer, per day, per location.

The Sports Wagering Limits policy in the *Retailer Policy Manual* will be updated April 1, 2024, as follows:

### 4.13 Sports Wagering Limits

OLG's sports wagering limit for POOLS is \$500 per customer, per day, per location.

**NEW!**

**OLG's sports wagering limit for PROLINE is \$100 per outcome (individually or combined), per customer, per day, per location.**

Retailers and their Staff may not permit customers to exceed the POOLS or PROLINE wagering limits.

**Failure to comply with this policy will result in Corrective Action and, depending on the outcome of an investigation, may result in penalties ranging from a violation letter up to termination of Retailer Agreement.**

### How to identify this activity

- Do not process the same \$100 wager slip more than once for a customer.
- If you are processing multiple \$100 wagers from the same customer, check the slips for duplicate wagers before printing tickets.
- The lottery terminal will be updated in late Spring to identify when successive identical \$100 wagers are processed. More information will be provided once that solution is launched.

# Questions & Answers

## **Q1: What has changed from the current policy?**

A1: The current policy permits wagers of up to \$100 per bet at a location on any given day. Under the new policy, customers will not be able to evade that \$100 limit by placing successive identical wagers. The new policy explicitly limits PROLINE wagers to \$100 per outcome (individually or combined), per customer, per day, per location.

## **Q2: What does “individually or combined” mean? Can you give examples?**

**Example #1** Toronto to win, \$1,000 total spend in \$100 increments – not allowed since they are wagering on the same outcome with more than \$100.

**Example #2** Toronto win, spend \$100, Toronto/Montreal over 6.5 goals spend \$100, Auston Matthews to score spend \$100, Toronto to cover -1.5 spread, spend \$100 – all of these are allowed.

## **Q3: Can a player bet on different markets?**

A3: Yes. It's only for identical wagers. For example: if they bet \$100 for Home Team to win game 44, they couldn't bet \$100 for Home Team to win game 44 on another slip.

## **Q4: Can a customer wager \$100 for Home Team to win game 44, and then \$100 for Home Team to beat the spread in game 44?**

A4: Yes, this is allowed. Wagers on different outcomes and markets are not considered identical wagers.

## **Q5: How can retailers identify the \$100 per outcome wagering limit for PROLINE has been reached for a customer?**

A5: The lottery terminal will be updated in late Spring to identify when successive identical \$100 wagers are processed. More information will be provided once that solution is launched.

### **In the meantime, here are some ways to monitor for this activity:**

- Do not process the same \$100 wager slip more than once for a customer.
- If processing multiple \$100 wagers from the same customer, check the slips for duplicate wagers before printing tickets.
