

# SPORTS WAGERING LIMITS MUST BE FOLLOWED TO AVOID PENALTIES

OLG's sports wagering limit for PROLINE is now **\$100 per outcome** (individually or combined), per customer, per day, per location.

The Sports Wagering Limits policy in the *Retailer Policy Manual* reads as follows:

## 4.13 Sports Wagering Limits

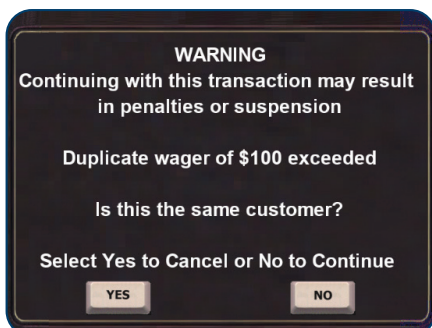

OLG's sports wagering limit for POOLS is \$500 per customer, per day, per location.

OLG's sports wagering limit for PROLINE is \$100 per outcome (individually or combined), per customer, per day, per location.

Retailers and their Staff may not permit customers to exceed the POOLS or PROLINE wagering limits.

**Failure to comply with this policy will result in Corrective Action and, depending on the outcome of an investigation, may result in penalties ranging from a violation letter up to termination of Retailer Agreement.**

**When the lottery terminal recognizes a violation of the \$100 limit on duplicate wagers, the following pop-up will appear:**

**By selecting No**, you are acknowledging that it is not the same customer.

**By selecting Yes**, you are acknowledging that it is the same customer and cancelling the transaction so the ticket will not print.

OLG monitors sports wagering activity that appears to be in violation of this policy and can launch an investigation into questionable activity that could result in suspension or loss of the privilege to sell lottery.

# Questions & Answers

## **Q1: What does “individually or combined” mean? Can you give examples?**

**Example #1** Toronto to win, \$1,000 total spend in \$100 increments – not allowed since they are wagering on the same outcome with more than \$100.

**Example #2** Toronto win, spend \$100, Toronto/Montreal over 6.5 goals spend \$100, Auston Matthews to score spend \$100, Toronto to cover -1.5 spread, spend \$100 – all of these are allowed.

**Example #3** Customer makes a \$60 parlay bet (combining different games) which includes Toronto to win. Customer then makes a Single Event bet of \$50 for Toronto to win. This is acceptable since it is not an identical wager. One is a Parlay and one is a Single Event.

**Example #4** Customer makes a \$60 parlay bet on a combination of games. Customer then makes a \$50 parlay bet on the same combination of games, changing only the bet amount. This is not acceptable since the bet, combined, is \$10 over the allowed \$100 per outcome.

## **Q2: Can a player bet on different markets?**

**A2:** Yes. It's only for identical wagers. For example: if they bet \$100 for Home Team to win game 44, they couldn't bet \$100 for Home Team to win game 44 on another slip.

## **Q3: Can a customer wager \$100 for Home Team to win game 44, and then \$100 for Home Team to beat the spread in game 44?**

**A3:** Yes, this is allowed. Wagers on different outcomes and markets are not considered identical wagers.
